

Technical Data Sheet

ADDIPAST[®] WD Series Carbon Black Dispersion Series

Responding to the coatings manufactures' need to comply with ever tightening environmental guidelines concerning volatile organic compound emissions, Venator Pigments have produced a range of water based dispersions using leading edge technology.

- Carbon black pigments for natural wood shade formulations.
- Wood protection by acting as long life inorganic UV absorbers.
- Low VOC / VOC free versions available.
- Optimum pigment colour and strength.
- Compatible with a wide range of water based binder systems.
- Free flowing, easily incorporated 'stir in' dispersions.
- Alkyl Phenol Ethoxylate (APE) free.
- Storage stability (shelf life) – 12 months under normal conditions in closed containers.
- Dispersions are sensitive to frost, for this reason storing < 0°C should be avoided.
- It is recommended to stir the preparations before use.
